

BACKRETE®

ECO-FRIENDLY & WATERLESS CONCRETE CLEANER

Did You Know BackKrete Works
Great With Power Washing?

Yes...You Can Power Wash & Use BackKrete!

- 1st Power Wash the Concrete area first.
- 2nd Blow the area relatively dry with a leaf blower.
- 3rd Spread the Backcrete powder over the stained area.
- 4th Done!

Advantage: The power washing will remove the surface soil and the Backcrete will get into the concrete pores to consume the oils and hydrocarbons. The BackKrete effect is a much more thorough cleaning vs power washing alone.

See BackKrete Website for Additional Information
